PROJECTS

My Portfolio | sourceCode | demoLink
- Built a fully responsive portfolio website with **React.js**
- Used all necessary concepts of react js like props and hooks
- Tech stack used: **React.js, Javascript, HTML5, CSS3**

MOVIElogy | sourceCode | demoLink
- Built a fully **responsive movies details** provider website using **Javascript** and **Movie database API** (TMDb API)
- Implemented features such as display list of popular/trending movies with their ratings
- Enabled search function so users can search movie by its name and get relevant details of that movie
- Integrated Recommendation function so users can get list of similar type of movies
- Tech stack used: **Javascript, HTML5, CSS3**

Keep Notes | sourceCode | demoLink
- Built a fully functioning **Notes taking** web application using Javascript
- Integrated CRUD function on it so users can perform **CRUD operation** with their Notes
- Implemented a function to save users data on **local storage**
- Tech stack used: **Javascript, HTML5, CSS3**
